About MotionRocket

MotionRocket is a software company that is driven by the desire to provide solutions for the sports video marketplace.

MotionRocket uses innovative technology to identify the needs of and provide solutions for individuals in the sports video marketplace.
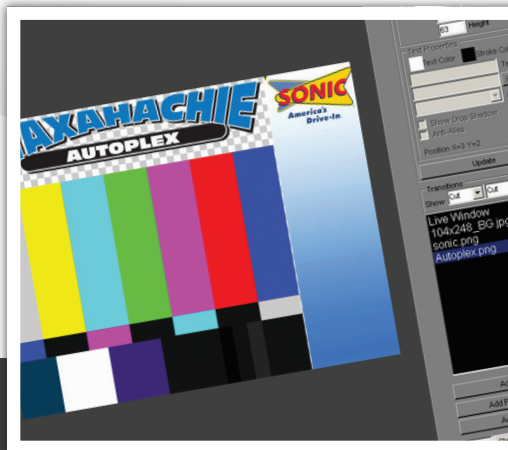

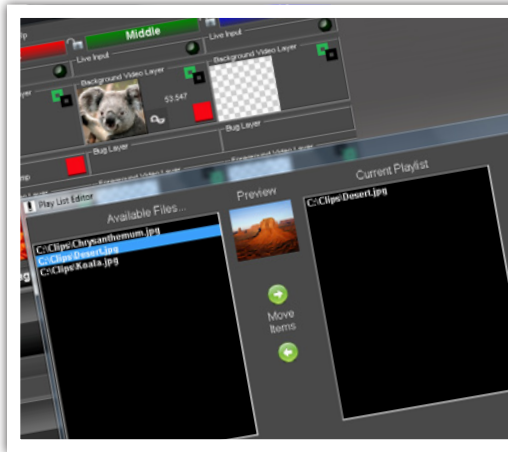

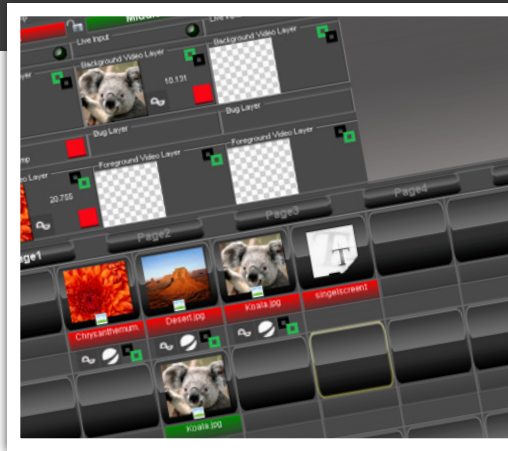

Launchpad

Launchpad provides content for LED displays in a sporting environment.

Launchpad is a clip server, with a sophisticated and easy-to-use interface that allows for fast learning. Save time and save money!

Launchpad is flexible, multi-codec compatible, and supports industry-standard graphics software.

Launchpad is affordable at almost half the price of similar systems. All hardware is included - no add-ons.

Launchpad Features

- Real-time serial data from industry standard scoreboard consoles

- Player and Team Stats

- Windowing. Allows a screen to be "split" into smaller windows

- Real-time pixel remapping to control fascia display

- Control HD screens and fascia from a single server

- One operator can control all content on all of the LED boards simultaneously

- Control five separate output video channels and independent audio channel from one machine

- Stable hardware. Featuring redundant RAID hard disks and optional redundant power supplies

- Supports Images in JPG, BMP, and PNG. Videos in AVI, MOV H.264, MOV MPG-4, WMV and MPG1. Audio in WAV an MP3

- Live HD/SD SDI Video input. Output on SDI, DVI or both
