

Launchpad is an excellent system not just for sporting events but for many other applications as well. Launchpad is user friendly, powerful, and very versatile. For example during instillation I had asked if there was a way to create a third channel with a score bug that could be sent to our video stream separate from our LED boards. Mark and I sat down and went over what we need to send it to our streaming switcher and when we were done it work perfectly. Being able to do this saved us so much time and effort. In the time that the University has had Launchpad and the LED board system we have used it for Men's and Women's basketball and the Centennial Charter Day Celebration. The University is now planning to use it for Commencement and all upcoming banquets.
